

Prof. Can Li and Prof. Yi Chen have been awarded the National Catalysis Achievement Award of China

Prof. Can Li and Prof. Yi Chen were awarded National Catalysis Achievement Award of China by the Catalysis Society of China at the 17th National Congress on Catalysis of China in October 13-17, 2014, Hangzhou, China.

Prof. Can Li wins the National Catalysis Achievement Award of China for his outstanding achievements in spectroscopic characterization, heterogeneous chiral catalysis and photocatalysis.

Prof. Yi Chen wins the National Catalysis Achievement Award of China for his outstanding achievements in fundamental research in catalysis and significant contributions for China's education in catalysis research field.

The National Catalysis Achievement Award of China was established in 2006 and is a set of biennial national award bestowed by the Catalysis Society of China in recognition of Chinese researchers for their outstanding achievements in catalysis research field and contributions on promoting the development of catalysis research in China.
